## CAREER OBJECTIVE

Flutter and Full Stack Developer skilled in building cross-platform applications, REST APIs, and AI-driven solutions. Seeking to contribute to a growth-focused team while building scalable and user-centric applications.

## TECHNICAL SKILLS

**Languages:** Dart, C, Python
**Frameworks & SDKs:** Flutter, React Native
**Mobile Platforms:** Android, iOS
**Backend & APIs:** REST APIs, Firebase Authentication, Firestore
**Databases:** Firebase, SQLite
**Tools:** Git, VS Code, Android Studio, Postman
**Core Concepts:** Debugging, State Management, UI/UX Design, Plug-in Integration

## PROFESSIONAL EXPERIENCE

**Flutter Developer Intern – ByteCraft Studios** *Jun 2026 – Sep 2026*

- Designed and developed the complete Employee role of a cross-platform application using Flutter, working across frontend development, backend development, and REST API integration.
- Built and refined responsive UI/UX, reusable components, navigation flows, and role-specific features, with a focus on consistency and usability across screen sizes.
- Implemented animations and interactive UI behavior while working with Flutter state-management concepts including `ChangeNotifier` and `ValueNotifier`.

**App Developer Intern – Finance App** *Aug 2024 – Sep 2024*

- Developed a cross-platform Personal Finance Tracking application with 8+ core screens using Flutter.
- Implemented the app's UI/UX component design using Figma and built the MVP in 2 days.
- Debugged and optimized UI performance during testing to reduce application lag.

## PROJECTS

**NetGap – AI-Based Community Application**

- Built and deployed a mindset-driven mobile MVP tested by 20 student users.
- Implemented an onboarding quiz workflow for structured user classification and grouping.
- Integrated 10+ dynamic API calls for feeds, messaging, and group recommendations.
- Improved usability through iterative testing and collaborative feedback cycles.

**LipSync Deepfake Detection System**

- Designed a CNN-based lip-sync manipulation detection model trained for 12+ hours.
- Achieved 85% detection accuracy using spatial and temporal modeling techniques.
- Applied multi-factor metadata validation to enhance verification reliability.

## EDUCATION

**Bachelor of Artificial Intelligence and Data Science**
KGISL Institute of Technology Nov 2022 – May 2026
CGPA: 7.9 / 10
